# Article wrapper

Test list continuation. And cross-references; item "2": 2 and item "4": D.

1. First item
2. Second item
3. Third item

And then a break occurs...a break in my sanity, apparently, because changing the numeration style across a "continues" break seems really stupid. But this a unit test, after all. Stupid is allowed.

D. Fourth item
E. Fifth item
F. Sixth item
