</refsection>
</refsection>
</refsection>
<refsection>

This is a not-so minimal RefEntry.

Ladjwqopnsfil
  This is a formalpara. That is, a paragraph with a title. One way to generate output for it is to take the title, "Ladjw-qopnsfil", and use it as a "run in" heading that is rendered inline at the start of the paragraph, followed by a period (or some other punctuation mark).
</refsection>
<refsection>

The following two words, "foo" and "bar", are both empasized, separately, with a space between them: *foo bar*. Here is the same pair of words in bold, with a space between them: **foo bar**
